How to save data :

When it fails to communicate or program, please operate as below；

1. Connecting the device - Starting it-Pressing option-Pressing Data Logging-Pressing on-Pressing ESC - Back to the main menu.

2,Keep the device at "on" state, go to test the car, when it fails to do the program. power off the machine please.

3.Pull out the TF card where there is a LOG file.

4. Send us the LOG file and the engineer would study the data and figure out the reason.

Note: Every time when you power off the machine, Data Logging would be "**OFF**". So if you want to save the data next time, please follow the above procedures.
