

Welcome to the [pcmtuner](#) installation guide

Preparation before installation:

1 Connect the device to the computer with power cable and USB cable, and plug the smart lock dongle into computer, like what I show you here .

2 Close all anti-virus software and firewall on the computer (the system firewall should also be closed. According to the system and software, Google how to close it if you don't know how to handle.)

3 Go to <http://tuner-box.com> download tool software

Like this check below picture

4 unzip the downloaded software check below

Name	Date modified	Type
 PCM_Setup	02.03.2022 18:58	360 压缩

5 then you will get 3 files like below

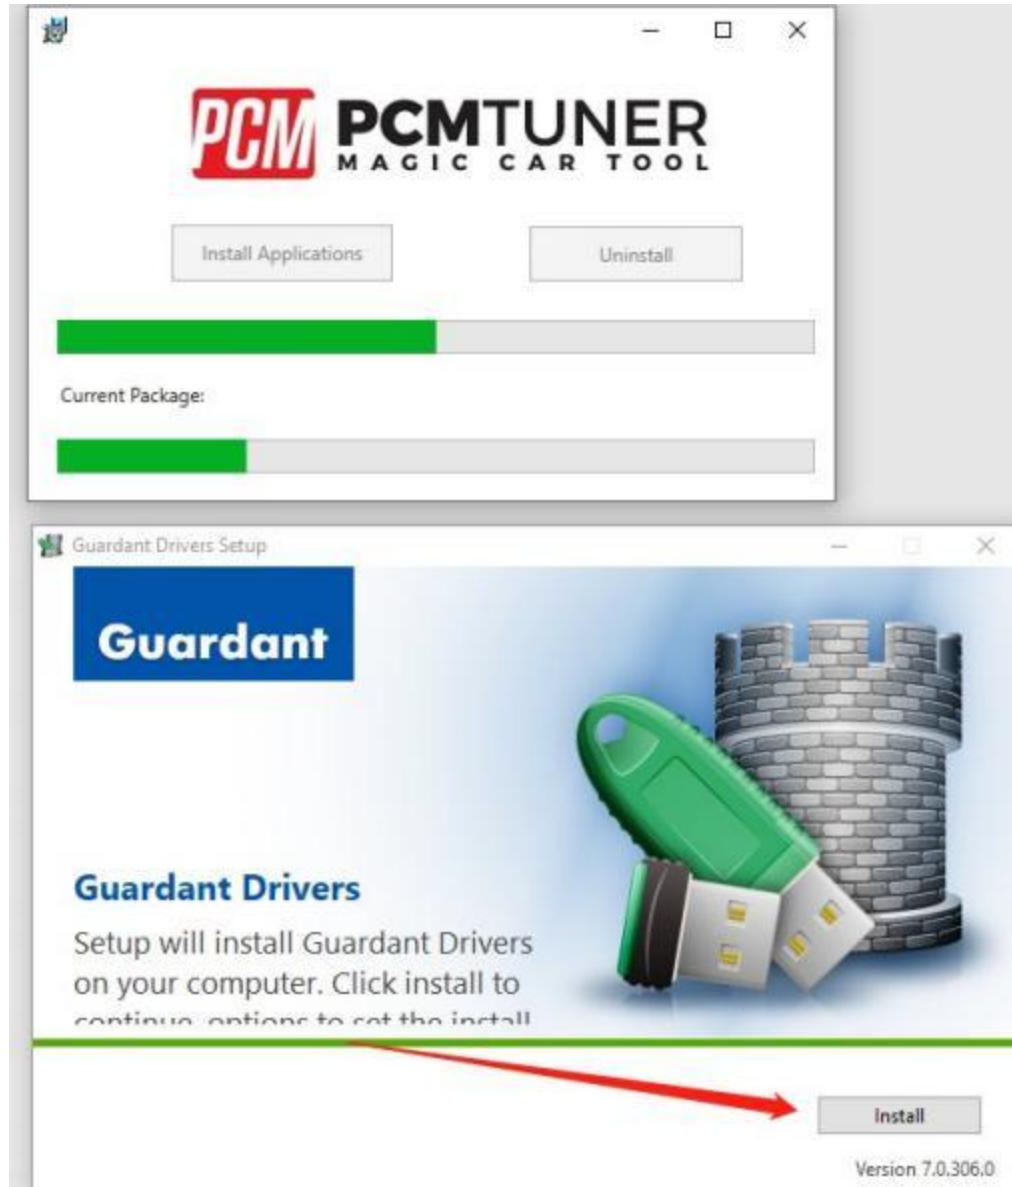

Name	Date modified
 Notice	01.03.2022 11:56
 PCM_Setup	02.03.2022 17:40
 VZperformance	02.03.2022 18:56

Hmmm,you need read the notice before start install all software

Then click PCM_Setup run it like below

Click here

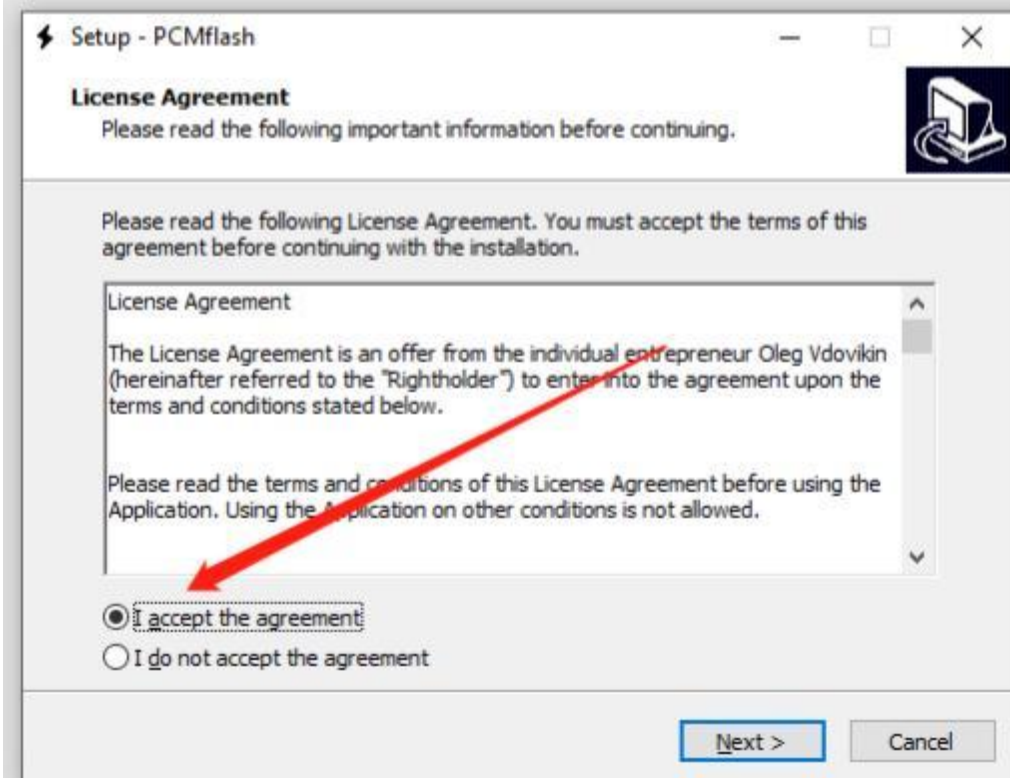

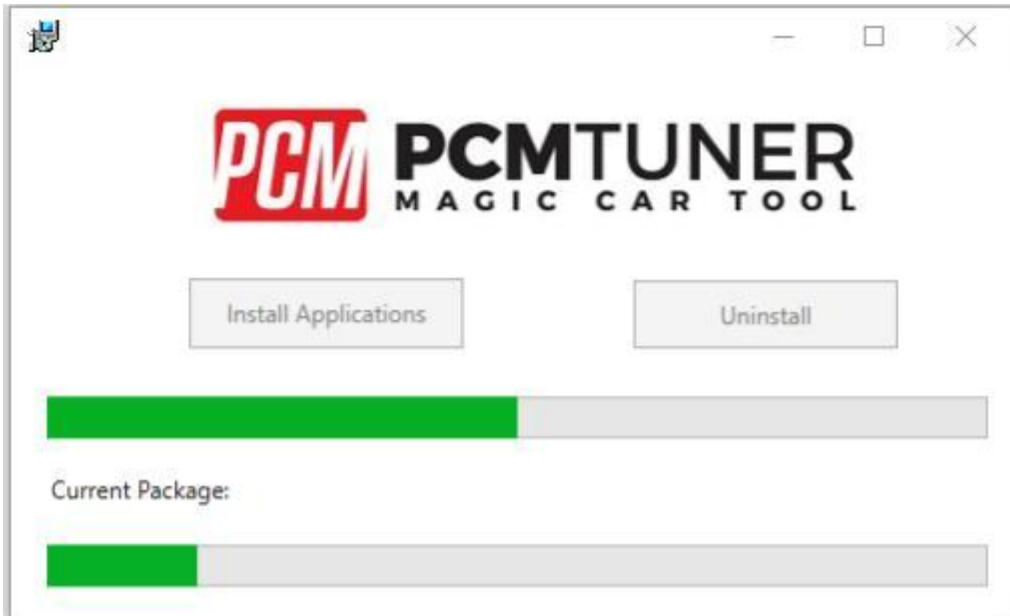

The image shows two overlapping windows. The top window is titled 'PCMTUNER MAGIC CAR TOOL' and features two buttons: 'Install Applications' and 'Uninstall'. Below the buttons are two progress bars, the first of which is partially filled with green. The bottom window is titled 'Guardant Drivers Setup' and displays the 'Guardant' logo. It includes an illustration of a green USB device and a stone tower. The text in this window reads: 'Guardant Drivers Setup will install Guardant Drivers on your computer. Click install to continue, options to get the install'. A red arrow points from the text 'options to get the install' to an 'Install' button. At the bottom right of the window, the version number 'Version 7.0.306.0' is displayed.
